\$500 Deposit due upon registration
Final Balance due 2/1/18

Just like Nautilus Aquatics, Dive Aventuras offers exceptional customer service with special attention to safety, enjoyment, and reef preservation. Their talented staff of multilingual scuba professionals is sure to enhance your diving experience with personal attention and contagious enthusiasm.

Diving the beautiful Riviera Maya

Part of the second longest barrier reef in the world, Puerto Aventuras offers uncrowded dive sites, rich with lush coral gardens with cuts and canyons ranging from 40ft to 130ft in depth. There is an abundance of marine life including friendly hawksbill turtles – a favorite with divers – moray eels, lobsters, puffers, spadefish, parrotfish, and angelfish, to name a few commonly seen. And don't forget your macro lens to get a close-up of a seahorse, arrow crab, or coral banded shrimp!

Minutes inland, the cenotes (pronounced say-no-tay, meaning "sacred well") are the most famous cavern/cave system in the world. They were created naturally over 6,500 years ago, and are filled with crystal clear, fresh water, opening to a vast system of underground caverns, tunnels and chambers. No advanced training is necessary for certified divers who want to explore the cenotes as we will have a certified guide, and the routes are bathed in natural sunlight. This is a dive experience not to be missed!
